

## iOS 8 Instructions!

Download files here 1. [iTools.exe](#) 2. [patch-1.0.ipa](#)

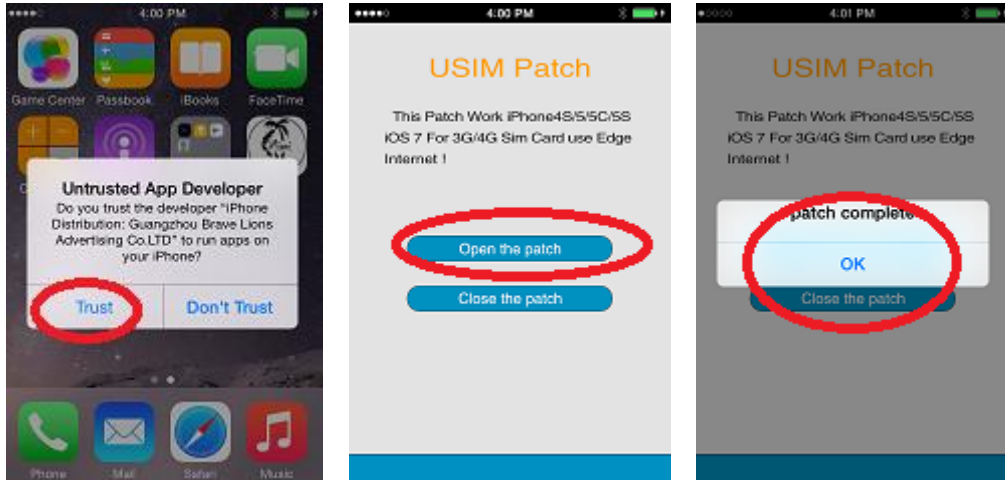

1. Download and save iTools. and patch-1.0.ipa on your computer.(**WINDOWS ONLY**)
2. Plug in your iPhone to computer and open iTools.
3. Click an 'Applications' then 'Install' locate patch-1.0.ipa and click 'Install'

And the patch will install on your phone.

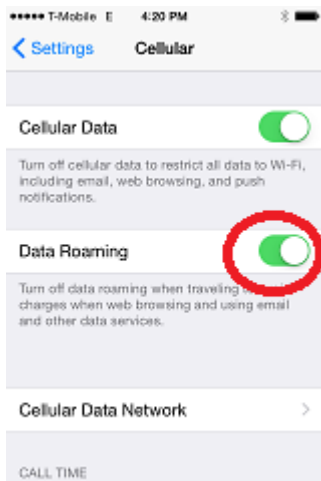

**4. Open it and click 'Open Patch'**

**5. Reboot your iPhone.**

**6. Make sure Data Roaming is 'ON'. It's under Settings → Cellular**

**And that's it!!! Enjoy it!**

However if you still get 'No Service'. Restore your iPhone in iTunes (DFU mode). Do these steps over, then go to Settings → General → Reset → Reset Network Settings. After phone reboots, open 'Patch' app, and click 'Open the Patch'. And you will get the service 100%.
